This application is written in Swift, so please use a Mac.

1.Check out the whole set codes to the folder you choose.

2. In terminal, go to the folder with those codes.

3. Compile the codes with below command,
    %swiftc main.swift Models.swift PlayCards.swift RankHelper.swift
StdIOHelper.swift -o TechnicalChallenge
4. Run interactive mode,
    %./TechnicalChallenge

    Follow the instruction on the screen, enter card details, for
example,
    AH 9S 4D TD 8S 4H JS 3C TC 8D

    press enter, system would start to process
    Once it's done, system would remind to enter another set data,
enter,
    2H KD 6C TC TD 5H 4D 3H 2C AS

    And so on.
    To quit this mode, enter "stop", it would then print the
summary.
5. To test the accuracy, enter,
    %./TechnicalChallenge poker-hands.txt

    Press enter.
    System would display the total winners for data in this file.

Note. % is the terminal command indicator.
